Free Virtual Keyboard

A free, lightweight, multilingual, and finger-friendly virtual on-screen keyboard

If you spend a lot of time responding to e-mail or jotting down notes on your mobile computer and find your hardware keyboard awkward or too small, a screen software keyboard may be just the improvement you've been seeking. This handy keyboard has keys large enough to be typed with the fingertips.

Free Virtual Keyboard works on any Windows-based PC with a **touchscreen** (Surface Pro, Tablet PC, and Panel PC).

Also, Free Virtual Keyboard allows people with **mobility impairments** to type data by using a pointing device.

Sponsor

Hot Virtual Keyboard packs a number of advanced features to make on-screen typing faster, easier, and more accurate. Fully customizable look and behavior.

in both landscape and portrait orientation, something other keyboard does not do.

Auto-repeat function

The autorepeat function (any key held down to repeat the same character continuously) is automatic. All relevant keys would auto-repeat when pressed continuously.

Run it from your portable USB flash drive

Free Virtual Keyboard is a totally portable application, meaning that you can put it on any USB stick and run it directly from there. In this way, your interactive keyboard will always be with you.
The settings are stored in the *FreeVK.ini* file located in the program installation folder. If it's impossible, settings are stored in the registry.

Get it from Microsoft
